

<b>V-Zone Certification</b>				
<b>Property Information</b>			Floodplain Permit #	
Name of Building Owner			Property APN:	
Building Address				
City		State		Zip Code
<b>SECTION I: FLOOD INSURANCE RATE MAP (FIRM) INFORMATION</b>				
<i>Note: to be obtained from appropriate FIRMs</i>				
Community Number	Panel Number	Suffix	Date of FIRM Index	FIRM Zone
<b>SECTION II: ELEVATION INFORMATION</b>				
<i>Note: This form is not a substitute for an Elevation Certificate. Elevations should be rounded to nearest tenth of a foot.</i>				
1. Elevation of the Bottom of Lowest Horizontal Structure Member ..... _____ feet				
2. Base Flood Elevation..... _____ feet				
3. Elevation of Lowest Adjacent Grade..... _____ feet				
4. Approximate Depth of Anticipated Scour/Erosion Used for Foundation Design..... _____ feet				
5. Embedment Depth of Pilings or Foundation Below Lowest Adjacent Grade..... _____ feet				
6. Datum Used: _____ NGVD '29      _____ NAVD '88      _____ Other				
<b>SECTION III: FLOOD INSURANCE RATE MAP (FIRM) INFORMATION</b>				
<i>Note: This section must be certified by a registered professional Civil Engineer or Architect</i>				
I certify that I have developed or reviewed the structural design, plans and specifications for construction and that the methods of construction to be used are in accordance with accepted standards of practice for meeting the following provisions:				
a) The bottom of the lowest horizontal structure member of the lowest floor (excluding the pilings or columns) is elevated to a minimum of one-foot above the BFE; and				
b) The pile or column foundation and structure attached thereto is anchored to resist flotation, collapse and lateral movement due to the effects of the wind and water loads acting simultaneously on all building components. Water loading values used are those associated with the base flood including wave action. Wind loading values used are those required by the applicable State or local building code. The potential for scour and erosion at the foundation has been anticipated for conditions associated with the flood, including wave action.				
<b>SECTION IV: FLOOD INSURANCE RATE MAP (FIRM) INFORMATION</b>				
<i>Note: This section must be certified by a registered professional Civil Engineer or Architect</i>				
I certify that I have developed or reviewed the structural design, plans and specifications for construction and that the methods of construction to be used are in accordance with accepted standards of practice for meeting the following provisions:				
c) Breakaway collapse shall result from water load less than that which would occur during the base flood; and				
d) The elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement, or other structural damage due to the effects of wind and water loads acting simultaneously on all building components other structural damage due to the effects of wind and water loads acting simultaneously on all building components (wind and water loading values defined in Section III).				
<b>SECTION V: CERTIFICATION</b>				
<i>(Check: Section III _____ and/or Section IV _____ )</i>
